EDUCATION

Sathyabama University

Bachelors of Engineering [BE] COMPUTER SCIENCE AND ENGINEERING[CSE]

CGPA :8.78

chennai, Tamilnadu

2020 - 2024

TECHNICAL SKILLS

Programming Languages: Java,Sql

Libraries and Tools: Oracle, Git ,Github, Spring Boot

Core Technologies: HTML,CSS,JAVASCRIPT

INTERNSHIP

PROJECT INTERN

HCL TECH

Jan 2023 - April 2023

- * Developed a Responsive Online Quiz Application using Mongo-DB, React-JS, JavaScript and built an dynamic web application under HCL company.
- * Designed and developed an interactive web-based quiz platform allowing users to take quizzes, track scores, and review results in real-time.
- * Focused on scalable backend architecture and responsive front-end design to enhance user experience. Collaborated with a team of developers to ensure code quality, performance optimization, and timely project delivery.
- * Built a functional online assessment system enabling automated quiz generation and real-time result evaluation. Improved test-taking efficiency by automating manual quiz creation and grading processes.

PROJECTS

- **BANKING SYSTEM APPLICATION :** Developed a Java-based banking application utilizing OOP principles and collections for efficient transaction management. Implemented features like account management, fund transfers, and transaction history using Java collections A simple Banking Management System built in Java that allows users to create accounts, deposit money, withdraw money, open Fixed Deposits (FD), and check balances. This is a Core Java console-based project using HashMap for storing accounts in memory. [GitHub](#)
- **ATM SIMULATION APPLICATION :**Developed an ATM simulation project in Java utilizing OOP principles and collections framework to manage transactions efficiently. Implemented features like account management, withdrawals, deposits, and balance inquiries with a user-friendly interface. [Try it!](#)
- **QUIZ APPLICATION :**Designed and developed an interactive web-based quiz platform allowing users to take quizzes, track scores, and review results in real-time. Implemented user authentication, dynamic question rendering, and result analysis using Java and MySQL. Focused on scalable backend architecture and responsive front-end design to enhance user experience. Collaborated with a team of developers to ensure code quality, performance optimization, and timely project delivery. [Try it!](#)

CERTIFICATIONS

- **JAVA FULL STACK DEVELOPMENT CERTIFICATION-** JSPIDERS SOFTWARE TRAINING INSTITUTE.
- **HCL TECH PROJECT INTERN CERTIFICATION-** Completed Quick-Quizizz Application Under Superiors.
- **AZURE GITHUB WORKSHOP CERTIFICATION-** Microsoft Azure and Github Integration workshop.
- **W3 SCHOOLS ORGANIZATION CERTIFICATION-** Certified On Completion Of Courses JAVA,SQL,HTML.
